

# SYNOPSIS

## 3D Safari: Indonesia

Indonesia, the Southeast Asian archipelago, consists of more than 13,000 islands, most of which are uninhabited. This unique and fascinating environment leads to an animalworld found no where else on our planet. Our three-dimensional Safari through the jungles and islands of Indonesia will be introducing us to an array of unusual and often dangerous animals, all in brilliant 3-D. From the fascinating Sun Bear to the intriguing slow lorus, the hairy "man of the woods« and Indonesias most feared predator, our 3-D safari crew will take you to Indonesias most remote regions to experience the unique wildlife of Indonesia - close enough to touch. Our 3-D teams ultimate goal is the islands of Komodo to film the worlds most primitive and oldest species of giant lizard, the Komodo dragon. Share a unique insight into the behaviour of this "prehistoric« creature and many other animals in the island paradise of Indonesia, filmed in stunning 3-D.
