

SYNOPSIS

Newton - The Electromobile Revolution

Newton - Elektromobilität Kreisel

Three brothers, Markus, Johann and Philipp Kreisel have found a battery system which can help electric cars dominate the international market. They promise batteries, which charge faster and last longer than those currently being distributed. The electromobile revolution has begun. Will its competitive advantage be maintained across the world? - because even the big automotive companies have learnt from their mistakes and are now putting high achieving models in the race for success.
