

# SYNOPSIS

## Kenya: Big Five - Last Five?

It seems to be a true paradise, and it is a stunning adventure for everybody who experiences his first safari in one of Africa's national parks. The foreigners' focus is mainly on the «Big Five». Will they be found? Will they be seen? Buffalo, Elephant, Rhino, Lion and even Leopard...? With stunning pictures from air and ground this film explores the most exciting landscapes of Kenya and its wildlife. It shows that not only losing one of the »Big Five« would cause a sobering loss. Kenya's wildlife blooms due to its rich diversity. But it is an unstable diversity which could also brush away other iconic animals like the Grevy's zebras or the wild dogs in short term.
