

SYNOPSIS

Wonder Wood

Alles Holz

Homes, items of clothing, cosmetic wipes, instruments, motor fuel, toys, sweeteners, paper and finally heating fuel - all of them can be made from wood. In addition, ever more surprising discoveries are being made as wood has boomed over the past few years as a highly sought-after means of moving away from the fossil fuel age. This film presents Austrian innovations that have attracted international interest or are well on the way to doing so.

Year: 2011

Run-Time: 1 x 45 min.

Directed by Doris Fercher
