

# SYNOPSIS

## Royal Gardens of the Habsburg Family

### Die Gärten der Habsburger

The Habsburg-Lothringen family was, for centuries, one of the most powerful dynasties in the world; their empire was once so big, it was said that the sun never set on it. Their rule and their impact on the world still echo through architectural masterpieces and countless gardens and parks. This documentary brings this famous family's «green fingers», their glorious gardens, gigantic parks and astonishing plant collections back into the spotlight, whilst reminding us that gardens are mirrors of their time.
