

SYNOPSIS

Newton - Winter Sports without Snow

Newton - Wintersport ohne Schnee

What does the future of snowmaking technology hold?

The last winters have made is painfully obvious: snow is in short supply. Ski resorts below 1,000 metres above sea Level are particularly affected. The ongoing global warming could spell the end for these businesses. To avoid that, special plastic mats or snow cannons are used to reproduce a snowy surface. "Winter Sports without Snow" shows how such special mats are developed and what the future of snowmaking technology holds.

Year: 2015

Run-Time: 1 x 22 min.
