

SYNOPSIS

Vegetable Waste - From the Field to Garbage

Biomüll der Klasse 1 - das Wegwerfprodukt Gemüse

The numbers are terrifying: experts estimate that only a third of every 100 kg of vegetables cultivated in Austria ends up on a plate. The rest ends up in the bin. Dozens of tons of vegetables therefore end up in domestic biogas plants week after week. And sometimes, vegetables aren't even harvested because the price is not right, or the market is currently saturated.

Year: 2019

Run-Time: 1 x 48 min.

Directed by Alfred Schwarzenberger
