

# SYNOPSIS

## Austria's Forgotten Visionary - Nobel Peace Prize Laureate Alfred H. Fried

### Österreichs vergessener Visionär - Der Friedensnobelpreisträger Alfred H. Fried

A contemporary history documentary about a personality once known all over Europe and now utterly forgotten: Alfred Hermann Fried. Around the turn of the century, he played an important role in initiating the European peace movement, for which he was awarded, among other things, the 1911 Nobel Peace Prize. Even during and after the First World War, he continued his commitment and could not be dissuaded from the fundamental idea that ultimately only an - as he put it - «organisation of states» would be in a position to regulate the peaceful coexistence of peoples. The film portrays Fried's career. It's the way of an adventurous, tragic life and at the same time the path to the origin of the idea of a united Europe.

**Year:** 2011
