

SYNOPSIS

The Potato-Story

Die Kartoffel - Missverständnisse und Glücksfälle

Beautiful but poisonous above ground and unsightly but nutritious beneath - throughout history no other vegetable has been the subject of so much misunderstanding and misinterpretation as the potato. This film takes up the search for its origins and seeks to discover how it became one of the world's most important staple foods. Starting from a small Pacific island off the coast of southern Chile, the journey leads over the heights of the Peruvian Andes to Prussia, Ireland and finally to Austria, accompanied by amazing and tragic stories about the potato.

Year: 2008

Run-Time: 1 x 43 min.
