

# SYNOPSIS

## Twin City Liner - The New High-Speed Catamaran

### Strom Linie - Wien - Bratislava und zurück (Twin City Liner)

Cast off for the new Twin City Liner, which sails between Vienna and Bratislava. The modern, high-speed catamaran is bigger and more powerful than the old Twin City Liners, which have had their day. The documentary shows the history of the development of the new Twin City Liner: from its construction in the shipyard on the Isle of Wight, crossing the English Channel and its journey from Rotterdam to Vienna through the Rhine-Main-Danube Canal. This was a long voyage that the crew of the Twin City Liner has now completed and will start operating commercially with the new ship. More than 1.6 million passengers have travelled on this route to date.

**Year:** 2019

**Run-Time:** 1 x 25 min.
