Komodo - Königreich der Drachen

At the heart of the Indonesian archipelago lies the Komodo region, a unique paradise where natural selection has run its course for millions of years, without the interference of humankind. This group of islands is one of the last home of reptile domination, and the ruler of this kingdom is the Komodo Dragon. «Kingdom of the Dragon» explores the magnificent biodiversity found both above and below the waters of the Komodo National Park, and the growing threat of human encroachment into the dragon's domain.
