

SYNOPSIS

Detective DNA

Kommissar DNA

It is also used for archeological purposes. Nevertheless, DNA analysis also has its critics, who point out that human DNA typing could be abused by insurance companies, for example, to pinpoint genetic disease. Erroneous evidence in criminal cases might result in innocent suspects being convicted of a crime. The "Detective DNA" documentary shows the Crime Scene Investigation unit of the Vienna Police, as well as forensic specialists and archeologists at work, and portrays the history of DNA analysis.
