

SYNOPSIS

Schladming - Magic Mountains

Schladminger Bergwelten - Von Gipfeln und Gämsen / Zwischen Jahrhunderten und Hundertstelsekunden

Schladming not only one of Austria's finest ski regions but also its best managed -because it keeps a low profile and makes sure the ski season doesn't dominate the landscape. That means its wildlife is better protected than in most developed areas. Though this region is controlled by humans, it's a hot spot for wild animals -and sometimes even the wolves return to this territory, which once belonged to them.
