## Once Upon A Time

### Once Upon A Time

A Natural History Fairy Tale - that's the concept behind Michael Schlamberger's new film for UNIVERSUM. The Moravian and Bohemian forests are home to some of Europe's most beloved and mysterious fairy stories. In this new retelling, the King's raven is sent to discover a place where humans and nature live in harmony. Only this can release the Princess from a curse that has turned her into a bison. Castles, dark forests and snow-clad mountains, but also fields, open-cast mines - and even military training areas - reveal the unexpected wildlife of the Czech Republic and play a surprising role in this magical ecological fable.
