

SYNOPSIS

Untamed Vietnam

Untamed Vietnam

This is a land of unique ecological diversity and exotic wildlife that was until recently torn apart by war. Even as they are rediscovered, many species are already under threat from ceaseless development. More than 3,000 kilometers of coastline connect Vietnam with the fascinating water-world of the South Chinese Sea. To the north, where the water is cooler, are some of the world's richest coral reefs. The inland mountain forests may still hold great biological secrets, with species observed for the first time only in our generation.

Year: 2021

Run-Time: 1 x 52 min.

Directed by Heike Grebe and Johannes Berger
